

Power Steering Stop Leak

Bardahl Power Steering Stop Leak stops leakages Power Steering Systems. At the same time it can be used as a complete power steering fluid to level up the system.

Properties

- Stops leakage of the pump, steering valve or steering cylinder
- Prevent seals from hardening and give gasket their original body (Please note: can not repair broken gaskets, will not work with gasket made out of paper)
- Prevents oil from leaking at hose connections
- Prevents steering noise and vibrations of the power steering unit
- Is capable to resist high temperatures and pressure
- Can be used in all types of power steering fluids and automatic transmission fluids (With the exception of LHM fluid)

Directions for use

Pour the content of 1 can (300ml) in the reservoir of the power steering system
Do not fill over the Power Steering System.

Bardahl Power Steering Stop Leak restores the characteristics of the oil by the addition of new additives and therefore extends pump life.
