NAUTIC

MARINE PROGRAM

Bardahl Nautic

Bardahl has more than 70 years experience in lubricants and additives. Precision and complex technology make engines more economical and cleaner, but also require first class lubricants. In addition, high performance motors have to perform when prompted. The material is then tested to the maximum. It is therefore important that you use lubricants who can do this without any problems.

Besides lubricants there is a wide range of additives for oil, fuel and coolant.

OUTBOARD MOTOR OIL

10W40 4-stroke

A high grade mineral motor oil for all outboard engines with high power and high RPM. The unique additive package ensures maximum protection against friction and wear. This engine oil meets the latest requirements for outboard engines, as defined by the NMMA. NMMA FC-W (level) Evinrude, Johnson, Yamaha, Suzuki, Mercury, Chrysler, Mariner, Honda

Ref 56900 Available in 1, 5, 25 en 60 liter

10W30 4-stroke

A high quality motor oil for 4-stroke outboards that require a 10W30. The unique additive package, in combination with the latest base oil, provides maximum protection against friction and wear under the most varied conditions. This motor oil meets the latest requirements for outboard engines, as defined by the NMMA. NMMA FC-W (level) Bombardier, Sea-Doo, Evinrude, Johnson, Yamaha, Suzuki, Mercury

Ref 48200 Available in 1, 5, 25 en 60 liter

25W40 4-stroke

An excellent motor oil for 4-stroke outboards that require a 25W40. The unique additive package, in combination with the latest base oil, provides maximum protection against friction and wear under the most varied conditions. This motor oil meets the latest requirements for outboard engines, as defined by the NMMA. NMMA FC-W (level)

Ref 48300 Available in 1, 5, 25 en 60 liter

INBOARD MOTOR OIL

15W40 4-stroke

An advanced motor oil which is suitable for 4-stroke inboard engines both petrol and diesel with or without turbo. Also suitable for common rail diesel engines and low sulfur diesel fuel (EN 590). The additive package protects against friction and wear and prevents the formation of black sludge. Recommended for recreational crafts, normal use. API Service SL/CG-4 ACEA A3, B4, E2 VW 505.00, Deutz, Iveco, Perkins, Yanmar, Lombardini

Ref 48000 Available in 1, 5, 25 en 60 liter

15W30 4-stroke

A motor oil specifically designed for modern and high performance 4-stroke inboard engines for both petrol and diesel, with or without turbo. The extended additive package, combined with the best base oil, provides maximum protection against friction and wear, prevents the formation of black sludge and ensures long drain intervals. Recommended for high speed pleasure crafts. API Service SL/CI-4/CH-4/CG-4 ACEA A3, B4, E7 MAN: 271 Deutz: DQC0305 MTU: Type 2 Caterpillar: ECF-1A Volvo: VDS2/VDS3 Cummins: CES20076-77/20078

Ref 48100 Available in 1, 5, 25 en 60 liter

SPECIAL

Power TS-syntronic 2-stroke

A race proven full synthetic watersport two stroke oil. Blended for environmentally vulnerable applications and for the requirements of Bombardier-Rotax engines. Provides the ultimate in low ash, smokeless, anti-scuff and anti-wear protection. Cleans power valves.

NMMA: TC-W3 (S-06070) API/CEC: TSC-4 (TD)/ TSC-3 (TC) JASO: FB

Ref 56451 Available in 1 liter

GEAR OIL

75W90

A semi-synthetic gear oil for tailpieces (in- and outboard) and transmissions (both straight and bevel gear). This gear oil is designed to meet the most stringent requirements imposed by pleasure craft. API GL 4/5 SAE MIL-2105D

Ref 48800 Available in 1, 25 en 60 liter

Gear 40

A mineral based oil for use in pleasure craft transmissions for which a SAE 40 engine oil is recommended. Due to the special formula it is possible to use as a 90 gear oil (not extreme pressure).

API GL 4 SAE MIL-2105D

Ref 48900 Available in 1, 25 en 60 liter

EP90 Tailpipe oil outboard

A special oil for tailpieces that require an oil with EP properties and a SAE 80W90 viscosity. The exclusive BARD AHL POLAR PLUS - Fullerene C60 formula builds a triple protective layer. The excellent anti-wear and anti-foam properties ensure a perfect EP lubrication and excellent protection of the gears under the most severe conditions.

API Service GL 4/5 SAE MIL-2105D

Ref 450019 Available in 250 ml, 5 en 60 liter

COOLANTS

Concentrated Zitrec Drinkwater Antifreeze HT1

Prevents freezing of the drinking water system, water tank, water pipes and toilet etc and works up to -50°C. It prevents the formation of scale deposits and will not affect rubbers, plastics and metals. Non-toxic and biodegradable. After use rinse the tank and pipes thoroughly with water. NSF registered.

Ref 83600 Available in 5 en 25 liter

Coolant Winterstorage -35°C

Prevents freezing of all inter-cooling systems. This product is biodegradable, non-toxic and contains anti rust ingredients and works up to -35°C. Protects metals and alloys from corrosion.

Ref 83000 Available in 1, 5, 25, 60 en 210 liter

ADDITIVES

BDC

A complete diesel additive that prevents moisture and carbon deposits. Besides that it cleans the injectors and improves lubrication (important because of the decreasing percentage of sulfur in diesel). All this results in a better, more complete combustion of the injected fuel, which automatically results in more power and a fuel saving up to 3%.

Content 100 ml 1, 5, 25, 60 en 210 liter Ref 01200

Grotamar 71

An effective biocide, specially designed to remove bacteria and fungi from the diesel. Bacteria and fungi clog the diesel filters. It is possible that the fuel filter partially is clogged, but a filter also can get clogged completely which means that the engine is no longer running. The risk of engine damage and damage to the high pressure pump is high.

Content 500 ml en 10 liter Ref 102107/ 102109

Instead of lead

Prevents excessive wear on valve seats and to the surfaces of the cylinder head in unleaded petrol. The high-temperature protection is always maintained, when Instead of Lead is added to the gasoline.

Content 250 ml Ref 12219

Instead of lead GOLD

Has the same effective valve and valve seat protection as the Instead of Lead original, but with one very important difference: this Instead of Lead contains a powerful octane booster.

Content 237 ml Ref 3010

Fuel Stabilizer

Reduces evaporation, prevents condensation and prolongs the shelf life of gasoline by 24 months. Recommended when an engine is not being used for long periods of time.

Content 250 ml Ref 1164

Fuel Treatment

A fuel additive to keep the entire fuel system in best condition. Prevents pinging, wear and deposits on the intake valves.

Content 300 ml Ref 12009

E10 Fuel Improver

Makes it possible to fill up your tank with E10 gasoline without harmful consequences for your engine. In addition, the fuel additive has a positive effect on fuel consumption and helps cleaning the fuel system.

Content 250 ml Ref 03222

Top Oil

Lubricates the piston, the cylinder wall and the valve guides. Bardahl Top Oil dissolves carbon and deposits and ensures that it is burned along with the fuel.

Content 1, 5 en 25 liter Ref 02400

B2

For use in engines with many operating hours and / or excessive oil consumption and / or compression loss.

Content 300 ml Ref 01001

Oil Booster + Turbo Protect

Ensures a lubricating film on the moving engine parts; even after very long period of stand still. For maximum protection.

Content 300 ml Ref 11109

BOAT CARE

Hand Cleaner

Cleans deep into the pores of the skin and cuticles. Lanolin protects, nourishes the skin and leaves your hands small fresh. Removes oil, grease, lubricants, tar, paint, ink, resin, creosote, etc. Contains no hazardous chemicals, is environmentally friendly and is biodegradable and thus prevents pollution of the water surface.

Content 500 ml, 1, 3, 5 en 30 liter Ref 60300

Waterproof spray

Provides maximum protection against the ingress of moisture, dirt, acid rain etc. It protects including tarpaulins, tents, awnings, shoes etc. Tree resin and bird droppings are easily removed. Regular impregnation extends the life and improves the condition of the substance and makes it water-repellent. Contains a high quality UV filter system to combat fading and aging.

Content 400 ml Ref 60804

BD50

A universal penetrating oil with many different applications. Displaces moisture, lubricates, crawls into stuck parts, quickly dissolves rust, cleans and protects, stops squeaking and creaking of moving parts and connections.

Content 200 ml Ref 68302

Delta Clean

A highly concentrated, multi-purpose, biodegradable cleaner. This product is free of phosphates, non-flammable and easy to use and, moreover, economical. This cleaner penetrates deep into the dirt layer, soaked it go, let it dissolve and spread. Safe for your anti fouling layer.

Content 1 en 5 liter Ref 78500
