## Super Spray

**Bardahl Super Spray** is a penetrating lubricant designed to clean, penetrate, and lubricate all types of metal surfaces. This aerosol spray contains Bardahl's famous polar attraction formula to reduce friction and provide lasting lubrication.

### The problem

All metal surfaces are exposed at one time or another to corrosion and contamination by water, dirt, grime and the like. This corrosion and contaminants hinder free movement, lead to excessive wear or complete seizure. The foreign matter also sticks to regular lubricants forming sludge which prevents good lubrication. In addition, some surfaces have hard-to-reach electrical contacts. Moisture and corrosion on these contacts mean either erratic operation or complete failure.

### The action

**Bardahl Super Spray** contains solvents, a penetrant, Bardahl's "polar attraction" formula, an anti-oxidant, and a high grade oil for superior lubrication. The solvents wash away dirt and sludge upon application, allowing Super Spray's other ingredients to reach the metal surfaces. The penetrant has low surface tension that lets it flow into tight places and carries the other ingredients with it. The anti-oxidant works chemically to prevent oxidation, the cause of rust and corrosion. Bardahl's polar attraction formula of extreme pressure agents bond to the metal providing a full time high strength molecular film to reduce further wear. Further friction protection is enhanced by the high grade oil.

After cleaning and penetrating the combination of **Bardahl Super Spray's** active ingredients displace moisture so that electrical contacts operate normally.

- Spray **Bardahl Super Spray** on rusty or corroded nuts and bolts to restore movement.
- Spray **Bardahl Super Spray** on wires and in distributor cap to reduce moisture caused shorts.
- Spray **Bardahl Super Spray** on tools, guns, fishing tackle, golf clubs, door locks, hinges, window mechanisms, linkages, control cables, etc., to provide lubrication and a lasting protective film.

**Bardahl Super Spray** uses include cleaning, penetrating, protecting and lubricating:

### At home:

- door hinges and locks

BARDAHL NL 6 OCD INTERNATIONAL

# Product information

---

- window linkage and hinges
- chair rollers and wheels
- cabinet hinges and rollers
- sliding doors and windows
- garage door mechanisms

## **In shops:**

- hand tools
- power tools
- utility tool maintenance
- lawnmower protection
- rusty and corroded equipment movement restored
- metal drilling lubrication
- automotive carburetor linkage and cables
- door locks and hinges
- distributor cap and electrical wiring

## **On water:**

- sailboat rigging
- pulleys and cables
- oar locks
- control cables and linkage
- canvas bracket hinges
- sliding hatches and windows
- inboard/outboard motor protection

Etc.

**Article number** 68204  
**Contents** 400 ml

**Article number** 68251  
**Contents** 1 liter

**Article number** 68255
