

Silicone brake fluid DOT5

Bardahl Silicone Brake Fluid DOT 5 is a high-quality silicone-based brake fluid.

This brake fluid has a very wide temperature range: -40°C to 260 °C and it ensures an optimally functioning braking system at low temperatures.

Bardahl Silicone Brake Fluid DOT 5 helps to prevent corrosion and provides excellent lubrication of rubber gaskets and metals.

Water does not stand a chance, due to the presence of silicone. It extends the life of the braking system.

Bardahl Silicone Brake Fluid DOT 5 has a much longer service life than DOT4 and DOT 5.1.

Bardahl Silicone Brake Fluid DOT 5 can be used in hydraulic systems of (race) cars, (racing) motorcycles, Harley Davidson motorcycles, carts, oldtimers etc.

Please note:

Silicone brake fluid should only be used in clean, dry, and new braking systems.

Specifications

- MIL-B-46176
- FMVSS-116 DOT 5
- Automotive All Weather

Analysis data

Test	Unit	Results
Viscosity at 100°C	mm ² /s	6
Viscosity at -40°C	mm ² /s	150
Viscosity at -60°C	mm ² /s	300
Specific Gravity	at 20°C	0.967
Vapor Lock	°C	260
Dry boiling point	°C	260
Wet boiling point	°C	180
