

## Turbo-Wash Concentrate 1:100

**Bardahl Turbo Wash Concentrate** (windscreen washer fluid summer use) is a breakthrough for cleaning car windscreens. If used in a mixing ratio of 1:100, it guarantees good visibility. It immediately removes thin layers of dirt that cause blinding reflections.

### The problem

---

A streaky and blurry windscreen is very annoying for drivers of cars and trucks. As a result of glare from the headlights of oncoming vehicles, it is almost impossible to have a good view through the sharply curved glass of modern, aerodynamically designed vehicles. An ordinary cleaning agent for windscreens or a Cleaner with windscreen washer antifreeze simply cannot get through the greasiness, dirt, and insects.

### How it works

---

**Bardahl Turbo Wash Concentrate** is a super-concentrated, powerful cleaning agent, so poor visibility through contaminated windscreens no longer has to occur.

A small amount of concentrate in the water tank makes driving a lot more enjoyable, even under the worst weather conditions. The use of Turbo Wash Concentrate offers you the following advantages:

- Guarantees good visibility
- Puts an end to dangerous streaky windscreens
- Easy to use
- Economical friendly

**Bardahl Turbo Wash Concentrate** protects the wiper blades and is not harmful to rubber and paintwork.

### The packaging

---

The vial used for the packaging of this product is new and different. The bottle itself contains 250ml. Of the agent, enough for water! If your reservoir has a capacity, you can suffice with 25 to 30ml 25 liter3 liter **Bardahl Turbo Wash Concentrate**.

### The use

---

Just squeeze the bottom of the bottle, and the reservoir is filled at the top. Pour the contents of this reservoir into the car's water tank; the rest of the agent remains in the lower part of the bottle.

#### Mixing order

1. Water
2. If necessary, windscreen washer antifreeze
3. Bardahl Turbo Wash Concentrate

It is advised to add '**Bardahl Anti frost**' to the mixture of water and **Bardahl Turbo Wash Concentrate** in the water tank of the windscreen washer fluid in winter.

**Analysis data**

Test	Results
Color	Green
Smell	Appel
Ph 100% at 20°C	8.5
Sg at 20°C	1.05g/cm3
Shelf life	Twenty-four months; 5-35°C

**Article number** 62905

**Contents** 500 ml
