InS certified

InS is a European organization responsible for registration of H1 lubricants and other products. InS Services determines whether a component is suitable for incidental food contact. This standard also defines the appropriate doses.

Bardahl let lubricants certify by InS which, by their specific composition, form no danger to human health when they occasionally come into contact with food.

Product information

Although the lubricants are H1, contact with food should be limited and in very small quantities. Too much pollution means that the food may not be used for consumption.
