

Classic Gear Oil SAE 90 GL1

Bardahl Classic Gear Oil SAE 90 is a 100% mineral single grade gearboxoil & cardan oil

Bardahl Classic Gear Oil SAE 90 has a minimum of additive ring and is therefore fully compatible with bronze copper brass and non-ferrous metals. The classic-tuned viscosity ensures a constant lubrication film under extreme loads.

It is suitable for sealing materials from that time (paper, cork, felt and fabric). The excellent adhesion contributes to minimal wear after long standstills.

Application

Suitable for gearboxes and final drives of oldtimers. Does not contain a friction reducer.
