

Belt Dressing

Bardahl Belt Dressing is a blend of special oils and acrylic polymers designed to prevent slipping of all V-Flat and round belts made of rubber, leather or fabric.

The problem

After a certain period of time belts will crack, start to slip and transmission will lose power. The slippage of the belt can also cause irritating noisy squeal. Aging, oxidizing, hardening, or drying out will reduce the life of a belt considerably.

The action

Bardahl Belt Dressing will give an immediate result and increase the belt pulling power by 50%. It will lengthen the lifetime of the belt, prevent cracking and increases the transmitted power by reducing slippage. It is particularly suitable for leather, rubber, canvas and most synthetics, and is effective in reducing squeal of vehicle fan belts.

This product differs in formulation and action from all other belt dressing. It will collect less dust and dirt, it will not harden and glaze, but remain soft, retaining its pulling power long after application. **Bardahl Belt Dressing** is waterproof and prevents slipping even after the most humid conditions.

Applications

Bardahl Belt Dressing may be used on conveyers, industrial and V-belts of all types. It should not be used where the use of a lubricant is not recommended by the belt manufacturer. It can be applied without removing safety guards in many cases. This product can be used in either automotive, do it yourself, agricultural, marine or industrial applications.

Directions of use

Spray onto the surface from 25 to 30 cm, ensuring an even coating over the whole surface. Spray from a safe distance in to the moving belt. Ensure all surfaces are covered adequately. The directional spray also makes it ideal for treating hard-to-reach inner surfaces of flat belts. It can be used indoors and outdoors where it ends belt slippage due to heat, cold, dampness or dust.

The applied film will not yellow or oxidize even over long periods, those giving maximum service life. It can be removed with most common solvents including white spirit.
