

## Product information

# E10 Fuel Improver

**Bardahl Fuel Improver E10** makes it possible to refuel E10 fuel without harmful effects on your engine.

E10 is actually Euro 95, but with 10 percent ethanol instead of 5 percent. To protect your fuel system against adverse effects when using this bio-fuel, Bardahl developed the E10 Fuel Improver.

E10 fuel consists of 10% ethanol and 90% from fossil fuels. The biggest problem of E10 fuel is that it entails the risk that certain rubber and plastic seals, sealing rings and gaskets can be affected.

In addition, E10 fuel is about 2-3% less efficient.

Most of the cars, research in the Netherlands shows about 90%, can refuel the E10 fuel without any problems. 10% of the fleet of vehicles is not apparent to add E10 fuel to the fuel tank.

With **Bardahl E10 Fuel Improver** the fuel is protected from the harmful consequences that could arise when E10 fuel is used. Furthermore, this fuel additive has positive effects on the fuel consumption and keeps the fuel system clean.

With this fuel addition the following properties are achieved:

- Improved the E10 fuel quality.
- Keeps the fuel clean.
- Protects against corrosion.
- Reduces fuel consumption.
- Improves cold start.
- Prevents ethanol certain rubber and plastic seals, gaskets and seals are affected.

### Use

Loosen the screw cap and squeeze the bottle until measuring cup contains the desired amount (10ml for 10L fuel). Pour the contents into the fuel tank before refueling. 1 bottle **Bardahl E10 Fuel Improver** is suitable for 250 liters of petrol.

**Articlenumber** 3222  
**Content** 250ml
