

Product information

Quick Start

Bardahl Quick Start ensures immediate starting of gasoline and diesel engines. It will protect the engine and the battery.

Bardahl Quick Start also prevents carburetor-icing. This product is indispensable for use in trucks, tractors, buses, cars, chain saws, construction equipment etc.

Directions for use

Spray product into the carburetor or air filter intake by using the nozzle with a tube. Spray only for a few seconds, then use starter.

The can is filled with propellant, which is harmless to the environment.
