

Product information

Exhaust Repair Paste

Bardahl Exhaust Repair Paste is a quick drying repair paste for sealing small holes, cracks and leakages in the exhaust system. This product does not contain asbestos and is easy to apply. It has a good resistance against heat and will withstand vibrations.

Use

Remove dirt and loose rust, by means of a wire brush or sandpaper. Moisten the spot to be repaired. Apply a layer of **Bardahl Repair Paste** with wet hands mould into holes and cracks, cover 2-3 cm. of adjacent area with paste to improve adhesion and finally do smooth down repaired area. Start the engine to heat up exhaust system and allow 4-5 min. for accelerated drying. Afterwards air dry for 1 night is necessary.

Operating temperature: approx.: 600°C
Short peak temperatures up to: max.1000°C
