

Product information

BD-50 Multi-spray

Bardahl BD-50 Multi-Spray is a penetrating lubricant designed to clean, penetrate, and lubricate all types of metal surfaces. This aerosol spray contains a special additive package to reduce the friction and provide lasting lubrication.

- Displaces moisture: from car ignitions, power tools, motorcycles etc. Lubricates: Tools, fishing, reels, hinges, locks.
- Penetrates: Rusted parts and sticking mechanisms.
- Cleans and protects: Electrical and mechanical parts;
- Removes grease, gum and tar, leaving a protective film. Fights rust: Inhibits formation of rust on metal parts.

Now there are many multi-sprays for sale. What makes Bardahl BD-50 Multi-Spray particular?

First, a mixture of high quality oils with a special formula, providing a long-term lubrication and protection. The unique high-pressure additives and polar organic compounds attach themselves to the metal. This creates an oil film on the metal that provides less friction and wear.

By its unique composition **Bardahl BD-50 Multi-Spray** stays attached even under water, so that the lubricating film can do its work and continues to protect. By the unique composition (strong) condensation and freezing have no chance.

In addition, **Bardahl BD-50 Multi-Spray** contains special organic ingredients so the smallest openings are achieved.

Finally, ensure anti-rust and corrosion components that further rust and corrosion is avoided. The potential of oil oxidation, caused by high temperatures or moisture are reduced.

All these characteristics make Bardahl BD-50 is unique in its kind.

Instructions for use

Spray on area to be treated. Do not wipe off. Harmless to paint, rubber and plastic.
