

# Bardahl Automatic transmission & Power Steering Stop Leak

**Bardahl Aut, transm & Power Steering Stop Leak** stops power steering leaks and can be used to restore the oil level of the power steering.

## Properties

---

- Stops oil leaks from the pump, steering valve, or steering cylinder.
- Makes gaskets and sealing rings supple again and increases the volume of the gaskets. (Note: does not repair torn or broken gaskets and/or paper gaskets)
- Prevents the oil from seeping through the couplings of the pipes.
- Prevents noise and vibration of the unit.
- Can withstand high temperatures and pressures.
- Can be used in combination with power steering and gearbox oils.
- Also applicable against leaks in LHM systems.

Recommended by most automotive manufacturers.

## Manual

---

Pour the contents of up to one can (300ml.) into the power steering reservoir. Do not exceed the maximum permitted oil level.

**Bardahl Aut, transm & Power Steering Stop Leak** also restores the properties of the oil by adding new additives and thus extends the life of the various components in the power steering system.

**Article number** 1755B

**Content** 300 ml
