

Petrol Air Intake Cleaner

Bardahl Petrol Air Intake Cleaner has been specially developed for the 360 Eco-cleaning machine. It is a solution, with revolutionary cleaning properties, able to remove deposits and soot in the air intake.

This air intake cleaning can only be used with the Sin1 360 machine (Ref 9372) and the gasoline air intake cleaning machine (Ref 9375).

Use

Bardahl Petrol Air Intake Cleaner has the following features:

- Eliminates deposits and soot in the air intake system
- Cleans intake valves and seats
- Guarantees valve seal
- Reduces excessive fuel consumption
- Limited emission of harmful substances
- Restores the original engine performance
- It is not necessary to disassemble the valves

Instructions for use

For professional use only Please refer to the User Manual of Bardahl Machines.

Test	Results
