

## Racing Petrol Treatment

Bardahl Racing Petrol Treatment is an advanced fuel additive, specially developed to remove water from the fuel and eliminate knock and auto-ignition problems. This product is optimized for racing and high-performance engines, where maximum efficiency and reliability are essential.

### Characteristics

- ✓ Lubricates the upper part of the cylinders and segments, compensates for the disappearance of lead in gasoline.
- ✓ Provides protection to valves and valve seats against wear.
- ✓ Eliminates pinging and uncontrolled detonation.
- ✓ Increases engine performance by improving power and acceleration.
- ✓ Effectively disperses water particles from the fuel.
- ✓ Facilitates cold start of the engine.
- ✓ Contributes to the reduction of fuel consumption.
- ✓ Keeps the fuel system clean and provides protection.

### Application

Racing Petrol Treatment is ideal for use in racing cars and other high-performance vehicles. It is suitable for both modern and classic engines, with an emphasis on maintaining engine integrity and optimizing performance. The product is particularly effective in minimizing wear and tear and improving the overall efficiency of the fuel system.

### Manual

For optimal results, refer to the technical instructions on the product label. The recommended dosage depends on the specific application and engine requirements. Add the product to the fuel tank before refueling to ensure thorough mixing with the fuel.
