

SHP Grease

Bardahl SHP Grease is high-quality water-repellent grease that provides long-lasting protection, lubrication and reduces wear.

Applications

This grease can be used for, among other things, lubricating bearings, chains, door locks, window and roof mechanisms, hinges and central locking. It is suitable for cold and hot conditions and protects against corrosion.

Manual

Shake well before use. Do not remove the excess product immediately because the solvent evaporates and a protective layer remains.

Analytical data

Test	Results
Color	wit-ivoor
NLGI consistency DIN 51818	2
Drop point DIN 51801	>250°C min.
ASTM D-1743	Grade 1
Oil separation 7 days/40°C IP-121	5% max.
Welding load ASTM D-2596	250 kg
Temperature range	-20 to 170°C
