

Cockpit Spray

Bardahl Cockpit Spray protects, penetrates, and beautifies all vinyl, rubber, painted, and plexiglass surfaces.

How it works

The mist of the **Bardahl Cockpit Spray** renews and protects rubber, vinyl, plastic, and leather with new power. The molecules form a thin, tough layer that blocks the bursting effect of ozone, the discoloring and debilitating effects of ultraviolet, and the hardening effect of oxygen. The mist of **Bardahl Cockpit Spray** refreshes and restores the original color of plastics. It repels surfaces from humidity and dirt. The product has a pleasant smell that serves as an air freshening.

Bardahl Cockpit Spray will often extend the average life of polymer materials. It improves the appearance and protection of all types of surfaces. The silicone in the product lubricates and stops the squeaking and cracking.

The product has numerous applications in cars and trucks, such as dashboards, door trims, consoles, plastic covers, vinyl sunroofs, and sun visors, but also all rubber, vinyl, and plastic parts in campers, boats, and other recreational vehicles.

In and around the house or desk, it protects and beautifies all types of material, furniture, instruments, and other electronic components.

The use

Remove heavy dirt and grease with a **Bardahl AllroundCleaner**. Spray **Bardahl Cockpit Spray** and divide it with a soft cloth. Let the product take effect. For maximum protection, it is best to repeat treatment.
